## Deploy Kilowatts in Minutes with PowerFunnel

Patents Pending

- Factory assembled and tested
- Arrives at site ready to deploy
- Installs in minutes
- Sized to your need and budget
- Expandable and relocatable
- No holes or loads on your roof
- Easiest maintenance
- Highest output

### Why Rural Solar?

Solar power is taking off, not just because of the “green” benefits, but because it makes sound economic sense. **In rural areas where power is more expensive, the benefits of solar power are even stronger.**

### Why on the Ground?

You’ve seen solar on rooftops, but if you have property, you have a terrific advantage in getting the best economic value from solar. **A system on the ground has benefits that can’t be matched by rooftop approaches.**

### Why PowerFunnel?

Building a ground-mounted solar installation used to be expensive, time consuming and complex. Well, not anymore. Now there’s PowerFunnel.

**PowerFunnel is a completely integrated solar appliance that has everything you need to start making power in minutes.** Sort of like a solar LEGO® Brick.

Just place PowerFunnel on flat ground facing south, add a bit of concrete in its base, and professionally wire to the grid. **Just like that you’re making power.**

# On or off the grid, PowerFunnel has you covered

Need to power a home, barn, shop, or out-building that's connected to the grid? Our flagship model provides 240Vac split-phase power, two circuits of 120Vac that's the same you have in your home right now.

What about electric fences, gates, deer blinds or feeders that need 12V or 24V DC power? Our 1224DC model has a built in charge controller. Just place a battery inside the PowerFunnel and connect to the system you are powering.

For larger off-grid applications or for use as a retrofit in existing higher-voltage DC systems, the HVDC model is a perfect and cost effective fit.

PowerFunnels are shipped efficiently and safely because they stack one inside another like shopping carts. There is also less onsite trash which is better for the environment and your wallet.

## PowerFunnel Configurations

Model	260Wdc Panel	Integrated Mounting	240Vac Grid-Tied	12Vdc 24Vdc Charging	Direct Panel DC Output
PF1000-260-240AC1P	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>		
PF1000-260-1224DC	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>	
PF1000-260-HVDC	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>			<input checked="" type="checkbox"/>
